HISTORY OF THE SCHOOL

In 1949, the Regents of the University of California authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way in 1950 for the opening of an undergraduate program in nursing leading to the Bachelor of Science (BS) degree and made possible the establishment of a graduate program to award a Master of Science (MS) degree in Nursing in 1951. In 1966, the Master of Nursing (MN) degree was established as an alternate option to the MS degree. The MS degree program was discontinued in 1969. The Regents approved the Doctor of Nursing Science (DNSc) degree program in 1986, and in 1987 the first doctoral students were admitted.

In 1996, the Office of the President and the Regents approved the change in the master’s degree designation from MN to Master of Science in Nursing (MSN); the change in doctoral degree designation from DNSc to PhD in Nursing was approved in 1995. In 2013, an en route MS option was established within the existing PhD program for students in the BS to PhD pathway.

To meet the educational needs of students who are registered nurses with Associate Degrees or diplomas in nursing, the original BS program curriculum was revised in 1997 and the RN to BS Bridge Program was established and continued until 2010.

In 2006, the School of Nursing reinstated the pre-licensure bachelor’s program (BS/pre-licensure) with admission at the freshman level and launched the Master’s Entry Clinical Nurse (MECN/pre-licensure) program within the MSN degree, which is designed for pre-licensure students with bachelor’s degrees in other discipline.

In 2018, the Office of the President and the Regents approved the Doctorate of Nursing Practice (DNP) degree program. The School of Nursing admitted its first class in Fall 2018.
PHILOSOPHY OF THE UCLA SCHOOL OF NURSING

The UCLA School of Nursing is guided by a philosophy that embodies the mission and goals of the University of California. The philosophy addresses nursing, the clients of nursing, and nursing students. The school is committed to an interdisciplinary learning environment.

Nursing encompasses clinical practice, education, research, consultation, leadership, management and service to the profession at both the local and global communities. Nursing involves individuals, families, groups, organizations and communities as patients. The profession must consider the human, physical and social environments that affect these patients, who may have health conditions that range from wellness to illness. Nursing activities must, therefore, include health promotion and maintenance, intervention and treatment, rehabilitation and restoration, and palliation. At an advanced practice level, nursing involves comprehensive healthcare, which encompasses the responsibility and accountability for continuity of care across the health-illness spectrum.

Nursing research is both applied and basic and has as its core actual or potential human responses to illness and as its goal the development of nursing science. Guided by ethical standards that consider the perspectives of the patient, the healthcare provider and the larger society, nursing has a social mission that encompasses the right and responsibility to provide leadership in health policy, as well as healthcare to all patients regardless of disease status, gender, race or culture.

People who receive patient-centered nursing care are complex individuals who exist in relationship to others in their family and community. This complexity of person involves biological, behavioral, emotional, psychosocial, cultural and spiritual dimensions. Each individual reflects a unique combination of these dimensions that interacts dynamically with the environment. The patients of nursing are autonomous decision makers who have certain values and knowledge about themselves that not only are relevant, but also essential to successful healthcare outcomes. As a result, nurses have the responsibility to protect the patient’s right to collaboratively participate with healthcare professionals involved in their care.

Successful nursing students are active learners who bring unique gender, cultural and ethnic life experiences to the professional practice of nursing and its advancement as a discipline. Students at all levels learn relevant theory, acquire practice skills and are socialized into the profession of nursing.

Increasing levels of complexity and sophistication of learning and socialization are expected of students in the different programs. Whether at the beginning practice, advanced practice, or scholar level, nursing students learn to apply knowledge, skills and professional attitudes in their work, which may include educative, administrative and research arenas. While students have the right and responsibility to participate in their own learning, faculty members have the right and responsibility to structure the teaching/learning environment to facilitate learning. Individual academic counseling and a variety of one-on-one, small-group, and interactive learning formats assist students to meet program and individual learning goals.
MISSION OF THE UCLA SCHOOL OF NURSING

The UCLA School of Nursing prepares nurses and scholars to lead and transform nursing care in a rapidly changing, diverse and complex healthcare environment through academic excellence, innovative research, superior clinical practice, strong community partnerships, and global initiatives.

Academics: The UCLA School of Nursing is ranked as one of the top nursing schools in the country by US News and World Reports. Through our innovative curriculum, students learn relevant theory, acquire practice skills and are socialized into the profession of nursing. The School of Nursing provides rich opportunities for students to pursue collaborative and interdisciplinary education and independent study projects. Individual academic counseling a variety of one-on-one small group and interactive learning formats assist students to meet program and individual learning goals and to apply knowledge, skills and professional attitudes in their practice. As the most competitive degree program on the UCLA campus, we attract the best and brightest students who will become leaders in transforming the profession of nursing.

Goals:
- Become the global leader of innovative education
- Lead transdisciplinary education
- Lead education of international students in nursing
- Spearhead the development of transformative nursing leaders
- Develop self-sustaining, cutting edge programs

Research: From the laboratory bench to the patient’s bedside, from pediatrics to geriatrics, from prevention to cause, ground-breaking advances are being driven by nursing research. At the School of Nursing, research is at the core of our mission – not only as a primary component of a comprehensive education, but as a critical investment in the future of nursing. The School has a rich history of blazing the trail for nursing research and is continually pushing the boundaries to improve health. Our findings are about advancing health and they can be used by other disciplines.

Goals:
- Lead cutting edge science
- Lead International Research
- Lead innovative transdisciplinary research that transforms health and health systems
- Develop future leaders in nursing research

Practice/Service: From a health center in the Skid Row area of Los Angeles, to communities throughout China to small rural villages in India, Uganda, the School of Nursing is engaging with local partners to improve the health of entire populations. We are delivering quality care, conducting collaborative community-based research and educating the healthcare workforce.

Goals:
- Lead the translation of knowledge into practice
- Spearhead development of a nationally recognized, financially self-sufficient community-based Health Center that serves disparate populations and is used as a training site for SON students
- Deliver transformative best practices content to healthcare providers worldwide
- Lead efforts to strengthen nursing practice globally
ACCREDITATION

The UCLA School of Nursing programs of study are approved by the Academic Senate of the University of California, the California Board of Registered Nursing, and are accredited by the Commission on Collegiate Nursing Education (CCNE). Curricular oversight and periodic reviews are conducted by the UCLA Academic Senate’s Undergraduate and Graduate Councils. The University of California, Los Angeles holds accreditation from the Western Association of Schools and Colleges (WASC). In 2010, the Commission on Collegiate Nursing Education (CCNE) accredited the existing bachelor’s and master’s degree programs for a term of 10 years.
Below is the organizational chart of the School of Nursing.
DOCTORAL PROGRAM OVERVIEW

The goal of the UCLA School of Nursing Doctor of Philosophy (PhD) degree program is to develop the foundation of knowledge upon which the practice of the profession is based through the conduct of original research and the generation of theory. Its purpose is to produce independent investigators who can conduct biobehavioral research, biologic science research or health disparities/vulnerable populations research. These research foci will advance the state of knowledge about how professional nursing practice and the delivery of health services can be improved.

Program Objectives
1. Design, conduct, and evaluate original research
2. Generate and/or test theory
3. Contribute significantly to the development of nursing science
4. Collaborate with research participants, clinicians, and researchers from multiple disciplines in the design and conduct of research and the development of science
5. Influence and contribute to the design of healthcare policy
6. Provide leadership within the nursing profession and in healthcare with cultural competence and attention to ethical decision making
7. Mentor educators and researchers

Underlying Beliefs

Nursing is one of the health sciences. As such, it draws on behavioral sciences, life sciences, health policy, economics and management to create its body of knowledge. Nursing has integrated knowledge from a variety of scientific fields which is applied to patient care to: identify and test nursing interventions, describe the process and outcomes of care giving, and identify and manipulate the environmental variables that affect patient care and the management of care. The nature of nursing as an academic discipline has been defined as a synthesis of biological and behavioral sciences as they apply to the care of patients in health and illness. This orientation to research distinguishes nursing from the biological and behavioral sciences while at the same time acknowledging its relationship to both. Nursing research draws also on the knowledge of health systems and health care delivery in order to improve patient care.

Nursing includes a broad spectrum of concerns. While many areas and styles of research might reasonably be considered relevant to nursing, the UCLA School of Nursing possesses specific strengths and opportunities. Therefore, the aim of this program is not to address the full range of research areas, but to focus on those specific areas in which we can expect to make the most significant contributions and to develop the School of Nursing as a center of excellence. These areas are defined by the research expertise of the faculty, by the supportive resources available at the Center for the Health Sciences and the wider academic campus, and by the conceptual framework guiding the School's curricula.

Program of Study

Nursing research at UCLA is carried out in the following areas of study as identified in the School's curricular framework. Students select a major area of study which is congruent with the scientific inquiry of our SON faculty.
- Biobehavioral Sciences focuses on the influence of both biologic and behavioral factors on health beliefs and health promotion, sense of well-being and quality of life, symptom management and adherence to and utilization of prevention and treatment services.

- Biologic Science focuses on phenomena in the biologic, physiologic and pathophysiologic sciences, including cellular adaptations and injury, genetics, neoplasia, inflammatory, immune and neuroendocrine responses and the effect of these on tissue and organ system function in the context of human health.

- Health Disparities/Vulnerable Populations focuses on nursing science in the area of community-based interventions to prevent disease, decrease morbidity and mortality for populations at a relative higher risk for poor health and in the context of a culturally diverse environment for care.

The research areas incorporate human diversity and the influence of the psychosocial and physical environments on health and health care. Commitment to these areas enables the School to respond with appropriate flexibility to changing nursing practice needs, to changing societal needs, and to changing opportunities created by the development of faculty strengths and student research interests. Thus, the areas are broad, interrelated and contribute to an integrated whole as specified in the School's curricular framework.

**DEGREE REQUIREMENTS**

**Course Requirements**

The diagram on the next page is a schema of the research process and maps the trajectory of the curriculum. All students take a required basic core consisting of the following courses:

**Nursing Theory (required):** Nursing 202, 206A, 206B, 210A, 210B

**Nursing Research:** Nursing 205A, 205B, 205C, 207, 208, 295A, 295B, 299A, and 299B. All doctoral students are required to take Nursing 205A, 207, 208, and 295A. Students proposing a qualitative dissertation research project must complete N205B and N205C, in addition to N299B. Students proposing a quantitative dissertation research project must complete N299B+/596 twice. Students conducting bench research might consider taking a graduate-level Chemistry course chosen in consultation with the faculty advisor, and should plan to take Nursing 299B twice.

**Nursing Statistics:** Biostatistics 100B, 201A, 201B

**Professional Development:** Nursing 299A, 299D, 495

**Cognates:** Minimum of 12 units at the graduate level, at least three courses in related fields relevant to the student’s area of research. See paragraph below for more information on cognates.

**Dissertation Preparation:** Nursing 596 (before advancing to candidacy), Nursing 599 (after advancing to candidacy).

With the guidance of the faculty advisor, students choose three cognate courses in a related field outside of nursing, relevant to their research question. The courses must be graduate level (200-299) and must be taken for
a letter grade. An Independent Study (596) does not count as a cognate. The faculty advisor and the PhD Program Director give approval of cognate courses. The Program Director will consider exceptions by petition for courses that are taught for S/U credit only. The number of S/U courses requested, the number of units of each course, the relevance of the course(s) to the student’s research and the availability of alternate courses will be considered. For all cognate courses, a **general student petition** should be obtained from the Student Affairs Office. The student must attach a description of the course and indicate how it relates to his or her research topic, obtain the advisor’s approval on the bottom left and submit the petition to the Student Affairs Office. The petition will be reviewed for approval by the PhD Program Director and Director of Student Services. Because advisor and program director approval are required for cognate courses, the student should prepare the petition in the quarter prior to enrollment.

With the approval of the student's faculty advisor, PhD Program Director, the Dean of UCLA Graduate Division and faculty and administration at the other campus, cognate courses may be taken at another UC campus by the **Intercampus Exchange** process when equivalent courses are not available at the UCLA campus. Students may elect to take additional course offerings in the School of Nursing or in other departments on campus as electives to further enhance their research preparation.

**Nurse Scientist Generates New Knowledge Through Research**

1. **Formulate the Research Question**
2. **Theoretical Framework**
   - Conceptualize Relationships Between Variables of Interest
3. **State of the Science:** Where is the Gap in the Literature?
4. **Philosophical assumptions** about knowledge, being, truth, & science influence how a phenomenon “shows up” to a Nurse Scientist as a potentially researachable problem

**Data Collection Method is Determined by the Research Question:**
- Quantitative
- Qualitative

**Consider Ethical Issues**

**Methodology Guides**

**Research Design Including**
- Data Collection & Analysis

**Interpret & Discuss Findings**
- in Context of Literature to Generate New Knowledge (including new theory)

**Disseminate Results**
- To Influence Evidenced Based Practice & Health Policy to Further Develop New Knowledge

---

**Independent Study Courses**

In preparing for the Oral Qualifying Examination, the student is required to enroll in Nursing 596 with her/his dissertation chair over two or three quarters to develop the research proposal. To enroll in Nursing 596, complete the **596 Petition**. The petition will need to be completed each quarter in consultation with the advisor. Nursing 596 will be taken for a letter grade. The contract must include learning objectives for the quarter and identify goals or outcomes such as, completion of literature review, in-depth review of appropriate research methodology or completion of research proposal.

After passing the Oral Qualifying Examination, students will enroll in Nursing 599, Research for and
Preparation of PhD Dissertation while in the process of research and writing the dissertation. Students may enroll in Nursing 599 with their Dissertation Chair and other committee members with their permission. To enroll in Nursing 599, complete the 599 Petition. Nursing 599 may be taken for either a letter grade or Satisfactory/Unsatisfactory, based on the objectives agreed upon by the chair and the student.

GUIDELINES AND POLICIES FOR THE WRITTEN QUALIFYING EXAMINATION

Purpose of the Written Qualifying Examination

The Written Qualifying Examination tests the ability to use knowledge in the areas of basic concepts of nursing science, nursing theory development, statistics, bioethics and the student's selected area of study. The purpose of this exam is to assess the student's ability to synthesize knowledge as demonstrated by the selection and integration of knowledge.

The written qualifying examination can be used to evaluate strengths and weaknesses in the mastery of content presented in the first year courses. In addition, this will aid in the identification of existing learning needs and facilitate appropriate academic counseling regarding program planning.

Written Qualifying Examination

The written qualifying examination will be required of all doctoral students at the successful completion of the following courses: Nursing 202, 205A, N207, 206A, 206B, 210A, 210B, 295A, 299A as well as Biostatistics 100B.

The exam will require students to: (1) identify their researchable problem and/or phenomena of study, (2) discuss the philosophical underpinnings that shape their view of the problem or phenomena, 3) discuss and appropriately apply a conceptual or theoretical framework, (4) provide a thorough review of the literature, and (5) provide a discussion and summary that describes how the student’s research will contribute to nursing science and shape nursing practice and the delivery of health care. Students entering without an Advanced Practice Master’s degree may have a different schedule for the Written Qualifying Examination and should check with their faculty advisor. Typically, students entering with the BS degree take the Written Qualifying Exam after the second year. Please refer to the Program Requirements Guide published by the Graduate Division for minimum and maximum time to the Written Qualifying Exam.

The exam will follow a take-home format. Specific instruction and the examination will be distributed at an information session and posted on the UCLA School of Nursing website by the end of the Spring Quarter. Students will have a specified amount of time to prepare their response to the examination criteria. Students must submit their exam as instructed for submission to Turn-It-In.com before the published deadline. All exams will be judged as PASSED or NOT PASSED. The written qualifying examination will be graded by at least two readers. Two passing scores must be achieved. If one reader passes the exam and one reader fails it, the exam will go to a third reader whose score will be the deciding factor. In the interest of providing students with feedback on their writing, all students who attempt the exam will receive the comments on their exam and be provided the opportunity to meet with the faculty advisor for a review of the exam grades.

Those students who do not pass the exam the first time are permitted to re-take the exam one time. In this case, students will be given approximately 3 weeks to review the comments of the faculty evaluating their exam and resubmit their revised examination before the beginning of the Fall Quarter of the second year (BS to PhD and ELM to PhD students before beginning the fall quarter of the third year). If a student fails the exam a second time, he/she will be terminated from the program.
Procedure for the Written Qualifying Examination

- The written examination will be given once a year in the summer.
- All exams will be judged as PASSED or NOT PASSED.
- The PhD Program Director will give a briefing about examination procedures before administering the examination.
- Should a student be unable to submit the examination on the specified date because of illness or other emergency, he/she should notify the PhD Program Director.
- The PhD Program Director will email examination results to the student’s official UCLA email address. A Written Qualifying Examination Result Summary is sent to the PhD Program Director.
- Students’ examinations are submitted to Turnitin.com.
- The students' examinations are filed electronically for a period of two years after completion of the PhD program.

Criteria for Passing the Written Qualifying Examination

The student:

- Provides answers that are complete, logical and responsive to the specific question(s) asked. All crucial aspects of the question are answered accurately and in detail.
- Writes a creative, independent, and original examination.
- Selects and applies theoretical framework(s).
- Demonstrates an understanding of the research process. Implications are made which are valid and appropriate.
- Demonstrates the ability to analyze and synthesize knowledge from his/her readings and courses.
- Organizes material in a logical way that reflects synthesis of pertinent concepts. Creativity and originality are demonstrated to some degree.
- Cites relevant sources to support responses.
- Plagiarism, copying and deception are violations of the Student Code of Conduct. Suspected cases will be reported to the Office of the Dean of Students for investigation and adjudication. See the Office of the Dean of Students website for more information on Academic Integrity.

Academic Integrity on the Written Qualifying Exam

Since the written qualifying exam is intended to demonstrate that students have mastered the material covered in the first year of doctoral study, students are expected to present their own work, with no outside help from faculty, other students, advisors, consultants or editors. Graduate students at UCLA are expected to write in standard, scholarly English. No outside assistance or editors will be permitted for any graded coursework, assignments or on the chapters for the dissertation. Since the tutors at the Graduate Writing Center follow a strict guidelines that do not result in unauthorized assistance, students are encouraged to use the tutors at the Graduate Writing Center to help improve their writing skills.

Students will submit their exams through the TurnItIn.com portal, where they will be reviewed for originality prior to being read by faculty graders. Students will be given the opportunity to submit drafts of their exams to the TurnItIn portal prior to the final due date so that they can review the originality reports and make any corrections where plagiarism or self-plagiarism exists. Students are encouraged to utilize TurnItIn as a tool for self-correction. Once the final written qualifying exam is submitted to the TurnItIn portal, any incident of plagiarism or self-plagiarism that is evident through the TurnItIn originality report will be referred directly to the Office of the Dean of Students for investigation and adjudication.

If the Office of the Dean of Students determines that academic dishonesty (which can include plagiarism, self-plagiarism and citation errors) has occurred, a sanction will be imposed by the Dean of Students. A sanction that involves a suspension of a quarter or more will result in the student having to reapply for admission to the program since graduate students must maintain continuous enrollment.
For further discussion of expectations for academic integrity, see the Academic Honesty section heading.

GUIDELINES AND POLICIES FOR THE ORAL QUALIFYING EXAMINATION

Purpose of the Oral Qualifying Examination

The purpose of the Oral Qualifying Examination is to evaluate the student's dissertation proposal. After passing the Oral Qualifying Examination, the student will advance to candidacy.

Oral Qualifying Examination

After the satisfactory completion of the following, the student is eligible to take the Oral Qualifying Examination:

- All required courses: Nursing 202, 205A, 206A, 206B, 208, 210A, 210B, 295A, 299A and either Nursing 299B+/596 (twice) for quantitative students, or Nursing 205B, 205C and 299B+/596 (once) for qualitative students.
- Passing score on the Written Qualifying Examination,
- Three cognate courses (12 units),
- Statistical series, Biostatistics 100B, 201A, 201B
- Establishing a dissertation committee (see next paragraph) and receiving approval of the committee from the Graduate Division
- Development of a research proposal

The student is responsible for obtaining the consent of four or more appropriate faculty members to serve on the Dissertation Committee. The "Nomination of Doctoral Committee" form must be completed and turned in to the Student Affairs Office. See Standards and Procedures for Graduate Study at UCLA for more information. Student Affairs will forward the form to the Graduate Division for approval. Students must nominate the committee and receive Graduate Division approval before taking the Oral Qualifying Examination. It is advisable to schedule the exam at least three weeks after the date the Nomination of Doctoral Committee form is sent to the Graduate Division. All members of the committee, both certifying and non-certifying, should be present for the Oral Qualifying Examination, thus the student is advised to schedule the meeting well in advance. Under specific circumstances, a committee member who is not the Chair or Co-Chair may participate remotely. Please refer to the Standards and Procedures for Graduate Study at UCLA for specifics.

Students must obtain the “Report on the Qualifying Examination and Request for Advancement to Doctoral Candidacy” form from Go.Grad.ucla.edu and bring it to the examination. The report should be completed and returned to the Student Affairs Office by the Chair of the Dissertation Committee for filing with the Graduate Division. Students will automatically be advanced to candidacy and billed the advancement to candidacy fee when the report is filed with the Graduate Division.

Scheduling the Oral Qualifying Examination

- Prior to scheduling the Oral Qualifying examination, an approved written proposal is required. This proposal should include introduction, literature review, conceptual framework and methods sections. The Chair and the committee establish the exact format for this proposal.
- When the Chair is satisfied with the quality of the proposal, the student should distribute it to the committee members for their feedback.
- After allowing at least two weeks for the committee members to read the proposal, the student should
contact them for feedback.
- The student should discuss the feedback with the Chair, make revisions and redistribute the proposal to
  the committee at least two weeks before the scheduled date for the Oral Qualifying Examination. The
  Dissertation Committee reads the proposal and certifies that the student is ready for the Oral Qualifying
  Examination.
- The student, in consultation with the Dissertation Chair and the other members of the Committee, is
  responsible for scheduling the date and place of the oral examination.
- The oral examination cannot be scheduled until after the student completes the final quarter of
  coursework (after the end of Spring quarter, Year 2 at the earliest).
- The Dissertation Committee will evaluate the student's performance on the oral examination and will
determine whether the student passed or did not pass. The student will pass with no more than one "not
  passed" vote.
- With approval by majority of the voting members of the Dissertation Committee, the Oral Qualifying
  Examination may be repeated once.
- The same Dissertation Committee evaluates a retake of the Oral Qualifying Examination. The student
  will pass with no more than one "not passed" vote.
- If the student is unable to take the examination on the specified date because of illness or other
  emergency, he/she must notify the Dissertation Chair as soon as possible, for approval to reschedule
  examination.

Dissertation

A dissertation is required and it should demonstrate an original and independent contribution to scientific
knowledge in nursing. The traditional dissertation format in the School of Nursing consists of 6 chapters
with references, appendices and tables. These chapters typically include: 1) Introduction, 2) Conceptual or
Theoretical Framework, 3) Review of the Literature, 4) Methods, 5) Results, and 6) Discussion and
Conclusions. Traditionally, the first four chapters have been required in preparation for the Oral Qualifying
Examination. The student’s dissertation chair will guide the student in the proper preparation of materials for
the Oral Qualifying Examination and in formatting of the traditional chapters or other suggested materials.

Dissertations based on the secondary analyses of data are acceptable if approved by the student’s dissertation
committee chair. As with dissertations based upon original data collection, dissertations utilizing existing
databases must study an original research question, be based upon a sound conceptual framework, meet
standards of rigor and scholarly interpretation, and reflect in-depth understanding of the qualities and
limitations of the database utilized.

Preparation for dissertation research and writing will be facilitated by the provision of Nursing 299B,
Nursing Research Seminars. Students generally enroll in Nursing 599, Directed Individual Study or
Research, after advancing to candidacy in order to work with their Faculty Advisor/Dissertation Chair.

Dissertation Committee members, otherwise known as Certifying Members, will be available to the student for
guidance while dissertation research is in progress.

An alternate format for the dissertation is the “Three-paper Option.”

**GUIDELINES FOR THE DISSERTATION: THREE-PAPER OPTION**

- Definition of papers: The papers must be full-length articles. Abstracts, monographs or short
  summaries will not be accepted.
- At least two of the papers must be data-based manuscripts. One of the three required papers may be
  either a scholarly review of the literature or have a theoretical focus.
- All papers, whether data-based or not, must be prepared from start to finish under the supervision of
  the Dissertation Committee.
- The student must be the primary author on these papers.
- Planned Content for the three papers, including titles, authorship, and potential journals for submission, are agreed upon by the Dissertation Committee during the oral qualifying exam.
- Papers may be submitted for publication prior to the Final Oral Defense only with the full approval of all Dissertation Committee members.
- Upon successful Final Oral Defense, the papers are to be submitted to referred journals either in nursing or other disciplines; evidence of manuscript submission, as determined at the defense, is **required prior to final dissertation sign off**.
- For information on determining authorship on papers submitted for publication, students should refer to “Authorship and Contributorship” provided by the International Committee of Medical Journal Editors.

**PROTECTION OF HUMAN SUBJECTS**

Any research conducted as a UCLA graduate student must be approved by the **Institutional Review Board (IRB)**. Application for IRB approval for the dissertation research is submitted after the Oral Qualifying Examination and final approval of the dissertation proposal. Specific policies are listed in the Standards and Procedures for Graduate Study at UCLA.

**GUIDELINES FOR THE FINAL ORAL EXAMINATION**

- Each student must successfully complete a **Final Oral Examination**.
- The examining committee will consist of all members of the **Dissertation Committee**.

**Procedures for Scheduling the Final Oral Examination (Dissertation Defense)**

- When the Chair is satisfied with the quality of the dissertation, the student should distribute it to the committee members for their feedback.
- After allowing **at least two weeks** for the committee members to read the dissertation, the student should contact them for feedback.
- The student should discuss the feedback with the Chair, make revisions and redistribute the dissertation to the committee **at least two weeks** before the scheduled date for the Final Oral Examination. The Dissertation Committee must agree that the student is ready for the Final Oral Examination.
- If there are conflicting recommendations for revisions from committee members/Chair, a meeting between the student, Chair and relevant committee member(s) is needed to work through conflicts.
- The student, in consultation with the Dissertation Chair, the other members of the Committee and the Director of Student Services, is responsible for scheduling the date and place of the oral examination. The student should make every effort to choose a date for the final defense that will allow for all certifying members to be physically present. However, if circumstances require it, one member may be present at the final examination via **ZOOM**. The Chair of the doctoral committee must be physically present for the final oral defense. If it becomes necessary for a member to participate via teleconferencing, the Chair of the committee as well as the Director of Student Services should be notified in advance so that videoconferencing can be arranged.
- The candidate will be expected to respond to any substantive and/or methodological questions raised during the meeting.
- The Final Oral Examination is open to the public. **The student must post a flier announcing the final defense a minimum of two weeks before the exam.** The flier should include the following information: Title of the dissertation, name of the student, name of the Chair, School of Nursing, date, time and location of the defense. The fliers must be posted in public locations around the School of Nursing.
- The Dissertation Committee will evaluate the student's performance on the Final Oral Examination and will determine whether the student passed or did not pass. The student will pass with no more than one
"not passed" vote.
- With approval by majority of the voting members of the Dissertation Committee, the Final Qualifying Examination may be repeated once.
- The same Dissertation Committee evaluates a retake of the Oral Qualifying Examination. The student will pass with no more than one "not passed" vote.
- If the student is unable to take the examination on the specified date because of illness or other emergency, he/she must notify the Dissertation Chair as soon as possible, for approval to reschedule examination.
- Certifying members will be responsible for final verification that the completed dissertation meets the criteria set by the School of Nursing and the Graduate Division for an acceptable dissertation.
- Gifts to committee chair and/or members are discouraged.

When Chair determines that the dissertation is ready, the student files his or her dissertation electronically as required by the Graduate Division. Please refer to Policies and Procedures for Thesis and Dissertation Preparation and Filing.

GRADUATION

It is expected that students will complete their doctoral studies within three to five years. Students and faculty alike share in the responsibility for ensuring that all requirements are met and important deadlines observed.

Sequential steps to be accomplished in order to graduate include:

1. Completion of all required coursework including removal of any incomplete grades.
2. Successful completion of the Written Qualifying Examination.
3. Nomination of the Dissertation Committee membership to the Graduate Division.
4. Successful completion of the Oral Qualifying Examination and Advancement to Candidacy.
5. Institutional Review Board approval.
7. Successful completion of the Final Oral Examination.
8. Submission of completed and signed dissertation and accompanying documentation to the Graduate Division.

Length of Time to Complete Requirements

Below is a chart to help students understand the normative time it takes to achieve certain degree milestones. Students reaching milestones beyond the maximum time may do so at the digression of the School of Nursing. Inability to make progress in the degree may result in termination from the program.

<table>
<thead>
<tr>
<th>Degree Milestone</th>
<th>Normative Time</th>
<th>Allowable Time Extension</th>
<th>Maximum Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Written Qualifying Exam</td>
<td>3 quarters</td>
<td>4-5 quarters</td>
<td>9 quarters</td>
</tr>
<tr>
<td>Oral Qualifying Exam and Advancement to Candidacy</td>
<td>8 quarters</td>
<td>9-11 quarters</td>
<td>12 quarters</td>
</tr>
<tr>
<td>Final Oral Defense of Dissertation</td>
<td>15 quarters</td>
<td>16-20 quarters</td>
<td>21 quarters</td>
</tr>
</tbody>
</table>

Note that summer is not counted as a regular quarter, even if the student is enrolled. Furthermore, quarters in which students are on an official leave of absence or withdrawn do not count as enrolled quarters. Once a student has passed the normative time for a particular milestone, the student will be invited, along with the advisor, to meet with the PhD Program Director and Director of Student Services to make a plan for completing the milestones within the allowable time extension.
ADVISEMENT

Overview

Upon the admission of each student, the Curriculum Committee will assign a faculty advisor, usually with research interests similar to those of the student. The student is expected to meet with their advisor prior to the first quarter and at the beginning of each quarter thereafter. In collaboration with the faculty advisor, each student plans a course of study that constitutes a unified program within the framework of doctoral program requirements and the student's research interests and career goals. The faculty advisor assigned by the Curriculum Committee may or may not become the student’s Dissertation Chair. Students are expected to engage faculty regarding their research interests and solicit commitment of one qualified faculty member as chair of the student’s dissertation. After being selected, the Dissertation Chair becomes the student’s advisor and mentors the student to direct the student's research. The roles of the Faculty Advisor and the Dissertation Chair are described in detail below.

The PhD Program Director keeps all doctoral program faculty advisors and dissertation chairs updated on policies and changes that occur in curriculum offerings both in writing and through monthly meetings. Additionally, students may make an appointment with the PhD Program Director and Director of Student Services for further clarification or guidance.

Qualification and Selection of Faculty Advisors

Faculty advisors must be School of Nursing academic track faculty and must be qualified to serve as chair of a dissertation committee as specified by Graduate Division and doctoral program policy. The Graduate Division policies regarding the composition of the doctoral committee can be found in the Standards and Procedures Guide.

Role of the Faculty Advisor

The faculty advisor plays an important role in orienting the student to the School and the program, assisting with clarification of goals, helping the student to structure a meaningful and integrated learning experience and monitoring the student's progress in adjusting to doctoral study. The specific responsibilities of the faculty advisor to the student are to:

- Interpret the doctoral program's design, requirements and policies.
- Assist in planning objectives for doctoral study and clarifying career goals.
- Assist in planning the student's program of study in accordance with program requirements, individual research interests and career goals.
- Assist with selection of appropriate cognate courses to create a unified program of study supportive to the student’s research interests and career goals.
- Assist the student in selecting a Dissertation Chair
- Monitor student’s progress through verification of completion and achievement of appropriate grades in required nursing, statistics and cognate courses as indicated in student's file.
- Communicate with student, Student Affairs Committee Chair and PhD Program Director when the student is not progressing at the appropriate level and assist the student with finding ways to improve.

If a doctoral student wishes to change his/her faculty advisor prior to nomination of the dissertation committee, it is recommended that the student file a General Student Petition with the Student Affairs Office. The previous advisor, the requested/new advisor, and the Student Affairs Committee must approve the petition. The PhD Program Director will be responsible for final review and approval of the petition.

Qualification and Selection of Dissertation Chair

For information on the qualifications of doctoral committee membership, see the Standards and Procedures
Role of the Dissertation Chair

The Dissertation Chair will become the student’s faculty advisor unless otherwise requested. The Dissertation Chair has the following responsibilities:
- Assume primary responsibility for guiding the student throughout the dissertation research process and completion of the dissertation, including selecting and delineating a research topic; developing a written proposal; carrying out the research as proposed and approved; and developing the dissertation.
- Assist the student in selecting a Dissertation Committee.
- In conjunction with the student, determine his/her readiness to take the Oral Qualifying Examination.
- Serve as Chair of the committee, which administers the Oral Qualifying Examination to the student.
- Evaluate the student's progress toward completion of degree requirements.
- Serve as the Chair of the student's Final Oral Examination Committee.
- Complete and forward the report from the Examining Committee to Student Affairs Office.
- Communicate Dissertation Committee concerns, such as, students who delay their progress, committee’s recommendation for delaying student progress, or approving or rescinding the 3-paper option, to the student, the Student Affairs Committee Chair, the PhD Program Director and Director of Student Services.

Qualification and Selection of Dissertation Committee

The student selects the Dissertation Committee with input from the Dissertation Chair. The committee consists of at minimum three School of Nursing qualified faculty members. A staff member (e.g., Statistician) may serve on the Dissertation Committee as an “extra” member, in addition to the four required members. The choice of committee members is based on mutual consent between the committee members, the Dissertation Chair, and the student, and is subject to the approval of the Dean of the Graduate Division. The student must file the “Nomination of Doctoral Committee” form. A list of qualifications for service on a doctoral committee is included with the form on page 2. A list of the School of Nursing’s faculty who are eligible to serve on a dissertation committee is available from the Director of Student Services. Additional members, including those from an institution or clinical agency representing the clinical and research interest, or a staff such as a statistician without professional rank may be nominated as non-certifying members by petition if the Student Affairs Committee and the student agree that additional experts are needed. Both the Associate Dean of Academic Affairs in the School of Nursing and the Associate Dean in the Graduate Division must approve the committee before the student can take the Oral Qualifying Examination. The student, the Student Affairs Office and each committee member will receive, by email, a copy of the approval form generated by the Graduate Division. For specific criteria on which faculty may serve on a doctoral committee, see the Standards and Procedures Guide for Graduate Study.

Role of the Dissertation Committee

The Dissertation Committee, selected on the basis of experience relevant to the dissertation research, serves in an advisory capacity to the student. The Committee ensures that the dissertation research and written dissertation are of sufficiently high quality to demonstrate to the scientific community at large the student's competence as an independent researcher. The responsibilities of the Committee are to:
- Advise and, when appropriate, approve the dissertation research plans and the written dissertation proposal. Approval is a Committee decision based upon majority rule.
- Be available to the student for consultation regarding the research and dissertation.
- Read the dissertation and, when appropriate, designate the dissertation to be defensible. The Committee's designation of the dissertation as complete and acceptable is based upon majority rule.
- Members of the Dissertation Committee are members of the student's Final Oral Examination Committee.
Student Responsibilities with Respect to Advisement

The student is responsible for:

- Communicating quarterly with his/her advisor regarding progress, goals and plans.
- Selecting a Dissertation Chair, in consultation with the Faculty Advisor.
- Initiating contact with faculty member whom he/she is considering as Dissertation Chair.
- Selecting, with the approval of the Dissertation Chair, members of his/her Dissertation Committee.
- Initiating contact with faculty members being considered as members of the Dissertation Committee.
- Becoming familiar with and complying with all relevant policies and procedures as set forth by the Graduate Division and the Curriculum Committee of the School of Nursing. Many of the policies are available on the Graduate Division website.
- Reporting problems that delay completion of the degree requirements to the advisor and the Director of Student Services.
- Timely submission of the Annual Progression Report to the Student Affairs Office, describing issues in progress, and if any, identification of a plan to resolve any identified problems. The report is distributed by the Director of Student Services via email.

Student Responsibilities Related to Completion of Degree Requirements

The student is expected to:

- Take an active part in planning his/her individualized course of study, including selecting appropriate cognate courses.
- Submit any petitions required for approval of cognate courses.
- Check transcript at the end of each quarter to be certain that courses are listed correctly and grades are reported accurately. If an error was made in enrolling or a grade is missing, it is the student's responsibility to follow-up with the appropriate forms or notify the instructor that the grade must be filed. This includes follow-up on courses taken on other campuses.
- Complete any incomplete coursework by the end of the next full quarter of enrollment or by an earlier, mutually agreed upon deadline.
- Maintain continuous registration or, if that is not possible, request a Leave of Absence from the Director of Student Services.
- Maintain a cumulative grade point average of at least 3.0 on a 4-point grade scale.
- Submit via General Student Petition any request for change in major area of study, or change in advisor or dissertation chair.
- Submit all necessary forms at the appropriate time: Independent Study Petitions, yearly signed progress reports, Nomination of Dissertation Committee, Report on Oral Qualifying Examination and Advancement to Candidacy, and Report on Final Oral Examination.
- Submit to his/her dissertation committee, in a timely manner, a proposed dissertation topic and a written dissertation proposal.
- Submit changes of name, address, phone or email in writing to the Advisor, to the Student Affairs Office, and on MyUCLA.
- Participate in program evaluation process via completion of progress reports and surveys requested by the School of Nursing and the UCLA Graduate Division.

FACILITIES

Instruction Support

The Office of Instructional Support (OID) provides support to doctoral students in several different ways. The OID provides room scheduling for presentations and meetings. They also provide limited audio/video
support including: Laptop and LCD projectors for PowerPoint presentations, or any other audiovisual needs. For room and/or equipment reservations, please contact OID at 310-825-4656.

Computer Laboratory

The use of computers is an integral part of several courses. Computing resources of the University include the Technology and Learning Center (TLC) located on the 2nd floor of the Biomedical Library. Clinical simulation programs as well as word processing, graphics, and statistical computing are also available. Personnel in the TLC assist students in the use of computers to facilitate their learning. Students must show a valid registration card and photo identification such as Bruin Card and will be expected to establish a Bruin OnLine account to utilize the computers at the TLC.

Doctoral Student Lounge

The Doctoral Student Lounge is located on the third floor of the Louis Factor Building (room 3-650). Doctoral students may use this room to study or meet. All doctoral students will need to have their student ID (issued by CHS Security) set up for access to the doctoral lounge from support staff in room A-618 Factor Bldg.

Alumni-Student Lounge

The Alumni-Student Lounge is located on the second floor of the Louis Factor Building (2-146 Factor Bldg.). This room is available to all students and School of Nursing Alumni during regular business hours.

Libraries

The Louise Darling Biomedical Library contains over 450,000 volumes and almost 6,000 current journals. The facilities include group study rooms, study carrels, study area for Health and Life Sciences graduate students, photocopy machines, learning resources facility, and the TLC. The Biomedical Library is located in 12-077 Center for Health Sciences. Medline and other literature search engines are provided with establishing a Bruin Online account.

Graduate Nursing Students may utilize the Graduate Reading Room (GRR), located on the third floor of the Darling Biomedical Library. The Graduate Reading Room is a safe, quiet place to study at all hours of the day and night. Access to the Graduate Reading Room is obtained by swiping the UCLA School of Nursing security badge. Students in the GRR are required to submit their badges for review by the security guards when requested.

Useful links for Graduate Students

https://go.grad.ucla.edu is an indispensable website for grad students. On this website, which requires login and password, students can access the Standards and Procedures Guide, the Electronic Thesis Formatting Guide, as well as useful forms and information.

Doctoral students are urged to familiarize themselves with the Graduate Division Standards and Procedures Guide for Graduate Study. The guide is published online every year and contains information on intercampus exchange, dissertation committee membership, incomplete grades, registration in absentia, leave of absence, probation, academic residency, filing fees and other information pertinent to all graduate students.

PROCEDURAL INFORMATION

Student Services

The Graduate Director of Financial Aid, is located in the Student Affairs Office, 2-151 Factor. Please see the Graduate Director of Financial Aid when you need forms or have questions regarding procedures. The office hours are Monday through Friday, 8:30 a.m. to Noon and 1:00 to 4:30 p.m. The phone number is (310) 825-2583. Sources for student financial assistance vary from year to year. Many sources of funding are listed on the Financial Assistance Fact Sheet. Copies of this fact sheet may be obtained from the web at www.nursing.ucla.edu.

The Director of Students Services is located in the Student Affairs Office, 2-153 Factor. Doctoral student records are maintained in this office.

Master Course Schedule

The Sample Course Sequence for each of the three pathways are included at the end of this handbook. Required doctoral courses are generally offered according to the schedule shown on the Sample Course Sequence, which is subject to revision if scheduling problems or curricular changes occur. Students should take note that nursing core courses are offered as scheduled only once each year and plan their completion of the program accordingly.

EXPLANATION OF LETTER GRADES FOR GRADUATE STUDENTS

The following grades are used to report the quality of graduate student work at UCLA:

A Superior Achievement
B Satisfactorily demonstrated potentiality for professional achievement in field of study
C Passed the course but did not do work indicative of potentiality for professional achievement in field of study
F Fail
S Satisfactory (achievement at grade B level or better)
U Unsatisfactory
I Incomplete
IP In Progress
DR Deferred Report

The grades A, B, and C may be modified by a plus or minus suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same term for students to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees unless otherwise prohibited by the program requirements.

All graduate students at UCLA are required to maintain a cumulative grade point average of 3.0 (a B average). Nursing students may earn a C grade in an individual course, provided their overall grade point average remains at or above 3.0.

PhD students who demonstrate poor performance in core coursework will be reviewed by the Student Affairs Committee for possible dismissal from the program. Poor performance is demonstrated by non-passing grades (either C- or lower in letter grade courses or more than one Unsatisfactory grade in an S/U graded course).
STUDENT QUESTIONS ABOUT GRADES

If a student has a question about a grade, the student should go to:
1. Lead Faculty
2. Program Director
3. Associate Dean for Academic Affairs
4. Dean

If a student has concerns/issues related to their ability to succeed (e.g., sudden financial crisis, illness or family crisis, personal issues/concerns):
1. Faculty Advisor
2. Theory Course Faculty
3. Student Services (including Director of Financial Aid in the case of financial concerns)
4. Program Director
5. Dean

POLICY ON ALTERNATE EXAMINATION DATES

In compliance with Section 92640 of the California Education Code, the University must accommodate requests for alternate examination dates for any test or examination at a time when that activity would not violate a student's religious creed, unless doing so would impose an undue hardship on the department.

Accommodation for alternate examination dates are worked out directly and on an individual basis between the student and the faculty member involved. Students should make such requests of the instructor during the first two weeks of any given academic term.

ACADEMIC HONESTY

UCLA is a community of scholars. All members, including faculty, staff and students, are responsible for maintaining standards of academic honesty. Cheating, plagiarism, unassigned collaborative work, multiple submissions without permission of the professor or other kinds of academic dishonesty are considered unacceptable behavior and will result in formal disciplinary proceedings, usually resulting in suspension or dismissal. All instances of suspected dishonesty will be referred to the UCLA Office of the Dean of Students for investigation and adjudication. In the meantime, a grade of DR (“Delayed Report”) will be reflected on the transcript for that class, and the student should continue attending classes and submitting assignments.

Every student is responsible for following the UCLA Student Conduct Code. Graduate students who receive a sanction of suspension from the Office of the Dean of Students will be expected to reapply per the policies set form by the Graduate Division. Graduate and Undergraduate students who are found culpable of violating the Student Conduct Code will be reviewed by the Student Affairs Committee to determine if the student may continue in the nursing program.

ACADEMIC DISQUALIFICATION AND DISMISSAL

University Policy

A student may be disqualified from continuing in the program for a variety of reasons. The most common
is failure to maintain the minimum cumulative grade point average (3.0 for graduate or 2.0 for undergraduate students) required by the Academic Senate to remain in good standing (some programs require a higher grade point average). Other examples include failure of examinations, lack of timely progress toward the degree and poor performance in core courses. Probationary students (those not meeting the minimum cumulative grade point average) are subject to immediate dismissal upon the recommendation of their department. University guidelines governing termination of graduate students, including the appeal procedure, are outlined in Standards and Procedures for Graduate Study at UCLA.

**Appeal Process for Grades and Progression through the Program**

Students wishing to challenge a test or clinical grade or a final grade in a course must first speak with the instructor of record, or the course coordinator, within one week of issuance of the grade. If this discussion is unsatisfactory, or the grade prevents progression through the program, the student may choose to submit a written statement regarding his/her concerns to the Student Affairs Committee (SAC). The student may choose to work with his/her advisor or consult the University Ombudsman for help with constructing the appeal. The following guidelines are meant to help the student understand the process and submit a well-thought out appeal.

1. The student should review the course syllabus, the course objectives and other aspects of the syllabus as it relates to the student appeal.
2. The Student should fill out the Request for Appeal form, available from the Director of Student Services, clearly highlighting the concern/issue and the requested remedy. Please note that the Student Affairs Committee may not change a grade, as that is the exclusive purview of the faculty of record.
3. The student should provide any supplemental information that is pertinent to the issue and reinforces his/her appeal.

After submitting the appeal, the chair of SAC, in conjunction with the Director of Student Services and Program Director, will review the appeal and request pertinent information from the faculty of record. Once the information is received the sub-committee will be convened to hear the appeal and make a decision.

The chair of SAC will send the results of that meeting to the student and the faculty of record within one week after the meeting. If the student determines that the final decision of the SAC is not satisfactory, the written appeal may be presented to the UCLA Graduate Division for further determination. See the Standards and Procedures Guide for Graduate Study for guidelines.

**APPEAL PROCESS FOR STUDENTS SUBJECT TO DISMISSAL**

Students can be subject to dismissal for failing to maintain the required cumulative GPA, unethical and unsafe behavior and for not earning the requisite grades in the program as stated in the progression policy. Graduate students who are subject to dismissal will be referred to Graduate Division with the recommendation that they be terminated from the program. If the recommendation is upheld and the student is terminated by Graduate Division, the student has 30 days in which to write an appeal to the School of Nursing’s Student Affairs Committee, who may either uphold the original decision to recommend termination or overturn it. See the Standards and Procedures Guide for further details.

**PROFESSIONAL COMMUNICATION**

Behavior and communication that is disrespectful to faculty, staff, Teaching Assistants (TAs), or fellow students are equally disruptive and prohibited. This includes communications that are aggressive or hostile in tone, including emails that demand immediate replies from faculty, TAs, or staff. Students who exhibit a chronic pattern of hostility and intimidation as indicated by the issuance of more than one Anecdotal
Note, including (but not limited to) verbal abuse, shouting, profanity, stalking, swearing, sexually suggestive talk, threatening communication of any kind, or any other activity that meets the legal definition of harassment, shall be referred to the Director of Student Services and may be referred to the Office of the Dean of Students to determine if a violation of the Student Code of Conduct has occurred.

DISCLOSURE OF STUDENT RECORDS

The disclosure of information from student records is governed by the Federal Family Educational Rights and Privacy Act (FERPA). Students are urged to familiarize themselves with UCLA Policy 220, which stipulates their rights and the use of their student information. The policy can be found at http://www.adminpolicies.ucla.edu/pdf/220.pdf. To summarize the policy, students have the right to:

- inspect and review their own student records
- request correction of their own student records
- grieve an alleged violation of privacy rights, as specified in the policy
- have personally identifiable information contained in student records not be disclosed without signed and dated written consent that specifically identifies the records to be disclosed, the purpose of the disclosure and the party or class to whom disclosures are to be made.
- file with the US Department of Education a complaint concerning alleged failures by CUAL to comply with the requirements of FERPA.

If a student wishes to inspect his or her own student record, a request should be made in writing to one of the Student Affairs Officers, who will then provide the student with the opportunity to view or photocopy their records within 5 business days. Before the student may view the record, the Student Affairs Officer will remove documents not covered by the policy, e.g. letters of recommendation for admission, parents' financial records, records containing personally identifiable information of another student.

COUNCIL ON DIVERSITY, EQUITY AND INCLUSION

The Council on Diversity, Equity and Inclusion shall serve in an advisory capacity to the Associate Dean for Diversity, Equity and Inclusion. The mission of the Council is to foster and support an inclusive climate in the School of Nursing in which faculty, staff, and students feel valued and are treated equitably. This involves consideration of the relations among faculty, faculty and staff, and faculty and students, and a commitment to the core values of diversity, equity and inclusion.

SAFE ZONE

The Safe Zone is sponsored by the UCLA School of Nursing's Council on Diversity and Inclusion.

The Safe Zone is a space where students can find a listening ear, encouragement and guidance in confidentiality.

While the Safe Zone is not intended to replace the academic advisement provided by a student's faculty and/or clinical advisor, or the program advisement and counseling available in the Student Affairs Office, it is a space where students can share personal issues affecting their academic success, without the fear of being judged or discriminated. Students can enter the Safe Zone with affirmation that they will be supported and valued.

The Safe Zone is designed to improve support to all UCLA School of Nursing Students. The UCLA School of Nursing believes in providing a community for students to feel safe, and foster an atmosphere of
inclusivity, in accordance with the philosophical beliefs of the School of Nursing's Council on Diversity and Inclusion.

**Safe Zone** Members:

**Rhonda Flenoy-Younger**  
Director of Recruitment, Outreach and Admissions  
Assistant Director of Diversity, Equity and Inclusion  
2-150 Factor Bldg.  
310 825-9193  
rflenoy@sonnet.ucla.edu

**Janet Kang**  
Student Services Coordinator  
2-147 Factor Bldg.  
310 825-6562  
jkang@sonnet.ucla.edu

**STUDENT INVOLVEMENT IN SCHOOL OF NURSING COMMITTEES**

Student input is valued in the governance of the School of Nursing and UCLA. Thus, students may be nominated, asked to volunteer, or be appointed to serve on various committees within the School of Nursing and the University. Students are encouraged to be actively involved in the School of Nursing and University-wide activities.

**CURRICULUM COMMITTEE**

This committee shall be composed of ten individuals: the Chair and Vice Chair and two faculty members who teach in the baccalaureate program, two who teach in the Master’s Advanced Practice Nursing program, two who teach in the Master’s Entry into Clinical Nursing (MECN) program, and two who teach in the Doctoral Program. The Chair and Vice Chair shall be elected by the full Academic Senate Faculty for a two-year term. The Chair, Vice Chair and at least six of the eight other members must be Academic Senate Faculty. The Associate Dean for Academic and Student Affairs shall serve as an *ex officio* member without vote. The duties of the committee shall be to monitor curricular matters, changes in courses, instruction and degree requirements; to oversee comprehensive and qualifying exams; to recommend cognate courses for doctoral students; and to recommend policies regarding the programs. Student representatives will be elected to the Curriculum Committee each academic year.

**STUDENT AFFAIRS COMMITTEE**

This committee shall be composed of one Academic Senate Faculty representative from each of the program specialties within the faculty functional units and one non-Academic Senate Faculty representative. The Chair shall be elected by the full Academic Senate Faculty for a two-year term. The Associate Dean for Academic and Student Affairs shall serve as an *ex officio* member without vote. Student representatives shall not be included. The duties of the committee shall be to select students for admission to the baccalaureate, master’s and doctoral programs, to review student candidates for awards, honors and scholarships, to make decisions and/or recommendations to appropriate funding bodies for recipients of awards, honors and scholarships, and to oversee all matters related to recruitment, progression and retention of students. Student participation is not allowed on this committee pursuant to the University Bylaws.
Change in Personal Information

Change in student's name, address, and/or telephone number should be communicated in writing to each of the following:
- Student Affairs Office
- Office of the Registrar (name change form available in Student Affairs Office, change address through MyUCLA)
- Student's advisor or Dissertation Chair

To facilitate contact with alumni, address changes following graduation should be submitted to the Student Affairs Office.

CAMPUS SERVICES

Student Health Insurance

All graduate students are required to purchase medical insurance as part of their registration fees. Students already covered by medical insurance through their employer or through the employment of another family member may request a waiver of this insurance fee on the Student Health website.

Student Health Services

The Student Health Service (SHS) makes available a complete range of preventive, diagnostic, and therapeutic health services at little or no cost to registered UCLA students. In cooperation with UCLA's Center for the Health Sciences and other community health agencies, SHS provides general outpatient health care through its primary health clinic, with referrals to specialty medical and surgical clinics. All registered and enrolled students are eligible to use the facilities provided by SHS. SHS is located in Arthur Ashe Student Health and Wellness Center on central campus between Ackerman Union and the John Wooden Center.

Health Clearance

All doctoral students who will have direct patient contact while conducting research are required to complete the health clearance process. Students can access health clearance information from the UCLA School of Nursing website. All health clearance forms must be completed and on file in the Health Evaluations section of the Student Health Service Office. Student Health Service will notify the student by email when the paperwork is complete and the student is cleared. It is the student's responsibility, to verify that his/her file in Student Health Service is complete and provide verification of health clearance. The Health Clearance Coordinator must be contacted at least 5 weeks prior to entry at a clinical site.

Status as a Licensed Registered Nurse

All doctoral students must maintain current licensure as a registered nurse. Doctoral students are expected to show evidence of a current registered nursing license upon starting the program.

Insurance

Students may, at the University’s sole discretion, be provided a University defense and indemnity for allegations of medical negligence arising out of clinical activities rendered pursuant to a University approved affiliation agreement. Such defense and indemnity, if provided, would be limited to allegations of medical negligence for those clinical activities performed within the State of California that are required as part of their University of California degree requirements. The University may require the student to purchase liability coverage. University students are not considered to be employees of the University of California and any coverage provided by the University is subject to the University’s sole determination and consideration of
University excess insurance and legal requirements. Students provided a University defense and indemnity must cooperate with University assigned counsel and will not be reimbursed for personal expenses incurred, including travel or lost income resulting from participating in defense of any action. Nothing herein should be construed as a promise to provide defense and indemnification nor should it be construed to discourage students from purchasing their own liability insurance policies.

The University does not provide worker compensation to students.

Policy Regarding Participation in Commencement Ceremony

The student must successfully defend and file his/her final dissertation by the June deadline (usually first Monday in June) in order to participate in School of Nursing Commencement Ceremony or the UCLA Doctoral Hooding Ceremony.

TEACHING APPRENTICESHIP

The majority of UCLA PhD students undertake the role of a Teaching Assistant at least once during their graduate career. Note that for many students, the financial aid package requires that the student TA each quarter. Becoming a successful TA is a skill, and not unlike other skills, requires practice, preparation, and collection of feedback and suggestions for improvement.

The Office of Instructional Development (OID) TA Training Program assists TAs at UCLA in improving their teaching and advancing their professional development. They are located in 190 Powell Library Building and available by phone: (310) 206-2622 or via email: tatp@oid.ucla.edu

Campus-wide TA Conference

Each year prior to the Fall quarter, the OID TA Training Program organizes a day-long conference designed for TAs. The conference consists of a series of workshops, microteaching session, a Faculty & TA Panel, and a Language TA Panel. Both new and experienced TAs can benefit from the enthusiastic and knowledgeable TA workshop leaders. All students are strongly encouraged to attend this conference Fall quarter of Year 1 of your program. Additionally, it is often a course requirement for N495 (Teaching Practicum, see below).

Departmental TA Training

Many UCLA departments require their TAs to complete a 495 Practicum designed to prepare them for the TA role. The practicum is organized, developed, and taught with select faculty members. School of Nursing requires all PhD students to enroll in Nursing 495 and Nursing 299D during the Fall quarter of their first year at UCLA in preparation for the TA role, as well as teaching in general. Successful completion of N299D and N495 is required prior to appointment as a TA. Additionally, all Nursing TA's must complete the SON computer training class prior to their first TA experience, and may be required to attend trainings to teach in the simulation lab. For questions about or to schedule training, contact Scott Dicks at sdicks@sonnet.ucla.edu.

TA Responsibilities

An apprentice appointment is for 13 weeks, which includes the week before the quarter, 10 weeks of the quarter, finals week, and the week after finals. Obviously, a teaching assistant’s responsibilities are not always the same from week-to-week, so some weeks students may work fewer hours and other weeks they
may work more. The 10 hours per week of a 25% appointment (20 hours per week of a 50% appointment) is intended to include time spent in preparation, teaching, office hours, reading, grading, attending lectures by the faculty member in charge of the course, and any other course-related work, such as responding to student emails or holding electronic office hours. If a student has a 50% appointment, the student should work no more than 20 hours per week during this period. Students should work no more than 220 hours during a one-quarter TA appointment.

If circumstances require a TA temporarily to work at a combination of academic appointments totaling more than 50% time, the TA must have the department petition the Graduate Division for an exception. In no circumstance is a graduate student permitted to hold academic appointments totaling more than 75% time.

Students are required to enroll in 12 units in the quarter in which they are serving as TAs. Failure to enroll in 12 units may result in the forfeiture of the TA award and stipend. Therefore, it is imperative that students check their enrollment to be sure they have at least 12 units during the quarter in which they TA. The Nursing 375 Teaching Apprenticeship course in which TA’s enroll may count toward one or two units of the required 12.

All students who intend to serve as a teaching assistant and who received an undergraduate degree in a country other than the US, must take and pass the Test of Oral Proficiency (TOP).

**TA Mini-Grants**

The Office of Instructional Development (OID) provides mini-grants to teaching assistants who teach regular university courses, for the purpose of defraying the cost of certain course enhancements. These funds cannot be used to supplement regular departmental supplies and expense budgets. Teaching assistants may receive no more than $250 in mini-grants per year.

**The Collegium of University Teaching Fellows**

The **Collegium of University Teaching Fellows (CUTF)** is an innovative program that creates unique learning opportunities for both graduate teaching fellows and undergraduate students on campus. Through the program, some of UCLA’s very best advanced graduate students have the opportunity to develop and teach a lower division seminar in their field of specialization on a one-time only basis. This experience serves as a “capstone” to the teaching apprenticeship, preparing them for the academic job market and their role as future faculty. At the same time, undergraduates enrolled in CUTF seminars have the chance to take courses that are at the cutting edge of a discipline, and to experience the benefits of participating in a small-seminar environment. For more information on applying for this program visit the UCLA Office of Instructional Development website.

Cognates: Minimum of 12 units, at least 3 courses, in related fields outside the School of Nursing. Your faculty advisor must approve each cognate course.

Qualitative Research: Students proposing a qualitative dissertation research project must complete N205B and N205C, in addition to N299B.

Quantitative Research: Students proposing a quantitative dissertation research project must complete N299B+/596 twice.

Biologic Research: Students completing a Biologic Research project complete N299B more than twice, and complete a grad-level Chemistry course chosen by their faculty advisor.

Examinations: See PhD Guidelines for explanation of requirements to be completed before taking Written and Oral Qualifying Examinations and for Final Oral Defense.

### Nursing Specialty Courses

Minimum of 12 units, of these at least 3 courses of graduate-level seminars in the Nursing specialty subject area (i.e. pediatrics, acute care, gerontology, etc.) Your faculty advisor must approve each cognate course.

### Cognates

Minimum of 12 units, at least 3 courses, in related fields outside the School of Nursing. Your faculty advisor must approve each cognate course.

### Qualitative Research

Students proposing a qualitative dissertation research project must complete N205B and N205C, and either N299B or N299C.

### Quantitative Research

Students proposing a quantitative dissertation research project must complete N299B+/596 twice.

### Biologic Research

Students completing a Biologic Research project must complete N299B more than twice, and complete a grad-level Chemistry course chosen by their faculty advisor.

### Examinations

See PhD Guidelines for explanation of requirements to be completed before taking Written and Oral Qualifying Examinations and for Final Oral Defense.
Each student is responsible for reading and understanding the content of the UCLA School of Nursing Student Handbook, and acting in accordance within the guidelines and spirit of the provisions outlined therein.

I __________________________ have read the UCLA School of Nursing Student Handbook, and my signature below indicates that I understand the content of the handbook as it applies to my course of study, and agree to abide by the policies and regulations outlined therein.
